

Recycling is Essential

“Recycling is one of the best ways for you to have a positive impact on the world in which we live. Recycling is important to both the natural environment and us. We must act fast as the amount of waste we create is increasing all the time.

The amount of trash we create is constantly increasing because:

- Increasing wealth means that people are buying more products and ultimately creating more waste.
- Increasing population means that there are more people on the planet to create waste.
- New packaging and technological products are being developed, much of these products contain materials that are not biodegradable.
- New lifestyle changes, such as eating fast food, means that we create additional waste that isn't biodegradable.

Environmental Importance

Recycling is very important as waste has a huge negative impact on the natural environment.

- Harmful chemicals and greenhouse gasses are released from trash in landfill sites. Recycling helps to reduce the pollution caused by waste.
- Habitat destruction and global warming are some of the affects caused by deforestation. Recycling reduces the need for raw materials so that the rainforests can be preserved.
- Huge amounts of energy are used when making products from raw materials. Recycling requires much less energy and therefore helps to preserve natural resources.

Importance To People

Recycling is essential to cities around the world and to the people living in them.

- No space for waste. Our landfill sites are filling up fast.
- Reduce financial expenditure in the economy. Making products from raw materials costs much more than if they were made from recycled products.
- Preserve natural resources for future generations. Recycling reduces the need for raw materials; it also uses less energy, therefore preserving natural resources for the future.

Importance of Recycling

“Recycling is important in today's world if we want to leave this planet for our future generations. It is good for the environment, since we are making new products from the old products which are of no use to us. Recycling begins at home. If you are not throwing away any of your old product and instead utilizing it for something new then you are actually recycling. When you think of recycling you should really think about the whole idea; reduce, reuse and recycle. We've been careless up to this point with the way we've treated the Earth and it's time to change; not just the way we do things but the way we think.

FPI Christian Bookstore: RECYCLING SERVICE

We should recycle because:

- **To Make Environment Clean**
- **Conservation of Materials**
- **To Save Energy**
- **Reduce Garbage in Landfills**

Recycling is good for the **environment**, in the sense; we are using old and waste products which are of no use and then converting them back to same new products. Since we are saving resources and are sending less trash to the landfills, it helps in reducing air and **water pollution**. Energy saving is important if we are to reduce the future effects of global warming. If we recycle one aluminum can, we are able to save enough energy to run a TV for around 3 hours. This will obviously depend on the energy consumption of your TV, but it gives you a great idea as to just how much energy can be saved during the process of recycling products.

It is believed that (the U.S.) cut approximately 40 million newspapers each day, leading to the equivalent of about half a million trees ending up in **landfills** every week. Paper, **plastic**, glass, **aluminum** cans are examples of some products that are recycled in large quantities.

Think about it; if you don't need it, don't get it. If you have to get it, get something that can be used again and if you get something that needs to be recycled by the professionals, put it in the recycle bin. Conservation is an important part of recycling issue. When you produce less garbage it helps in reducing the landfills and also helps in giving the land back to the nature.

Recycling serve 2 purpose: First, it avoid landfills and helps in reducing air and water pollution and secondly, valuable material like aluminum cans and plastic and glass are reused in other forms and not wasted. Be mindful of what you do, pay attention to the items you buy and always check yourself to see if you really need it or if it comes in a package with less waste. We can all do our part and we will make a huge difference." ***FPI Christian Bookstore is doing our part to help clean our planet – join us!***

Thank you.

conserve energy future

FPI Recycling Service

Help us keep our environment clean.

FPI Christian Bookstore is committed to taking care of our planet. We are also dedicated to our customers. Our Goal is to collect more than 15 tons of plastic (bottles) and aluminum (cans) annually.

Going green is good for business.

"Today, we operate one recycling facility domestically and help more than 30 communities, churches, schools, retailers, and manufacturers save money, save resources and create clean, renewable energy."

Fact

"Recycling one plastic bottle can save enough energy to light a 60-watt light bulb for six hours."

Why is Recycling Important?

Recycling is very important as waste has a huge negative impact on the natural environment. Harmful chemicals and greenhouse gasses are released from rubbish in landfill sites. Recycling helps to reduce the pollution caused by waste. Recycling reduces the need for raw materials so that the rain forests can be preserved.

"Whether you're trying to divert more waste from landfills, shrink your environmental footprint or create new revenue streams, we can help. Our team works to understand your specific needs and goals, tailoring solutions that add real and lasting value to your community and business."

FPI SERVICE SOLUTIONS

- Residential
- Church
- Educational
- Commercial
- Retail

We service the Antelope Valley area. *Special service is offered to our customers/organizations with large volume pick-ups within Los Angeles County.*

Recycling is one of the best ways for you to have a positive impact on the world in which we live. Recycling is important to both the natural environment and us. We must act fast as the amount of waste we create is increasing all the time. **Contact us today to schedule your FREE WEEKLY RECYCLE PICK-UP SERVICE – of plastic (drinking) bottles and aluminum cans.**
